DETAILED ACTION

1. This action in responsive to the communication filed on 11/19/08.
2. Claims 1, 3, 4, 6, 8, 10, 16 are allowed.

3. Reasons for allowance: Allowable subject matter:

Each independent claim identifies the uniquely distinct features of "finding of possible matching pairs comprising a point from the first set of points and a point from the second set of points, and finding a maximum number of matching pairs wherein the finding of a maximum number of matching pairs comprises the following steps: combining of two matching pairs at a time into a tuple to form a plurality of tuples, determining an affine map for each tuple, that maps the two points in each matching pair of the tuple onto one another, sorting of the plurality of tuples into a tuple list, creating a search tree on the basis of the tuple list, and deriving a matching result from the search tree, wherein the point from the first set of points and the point from the second set of points are each points of note on fingerprint lines, the first set of points corresponding to a scanned fingerprint, the second set of points corresponding to a reference fingerprint".

The closest prior art of record Ferris, fails to anticipate or render the above underlined limitations obvious. The other prior art of record fails to teach or fairly suggest substantially modifying Ferris with this specific feature in order to arrive at the invention as claimed in detail by the applicant.

Allowable Subject Matter

4. Claims 1, 3, 4, 6, 8, 10, 16 are allowed.
